Objective: Seeking a co-op in technical art utilizing in depth knowledge of art asset production and implementation, as well as programming and architecture. Available May – August 2020.

Education

Rochester Institute of Technology (RIT), Rochester, NY

Expected May 2021

Bachelor of Science, Game Design and Development

Minors in 3D Digital Design and Psychology

GPA: 3.65, Deans List Fall 2017 - present

Experience

RIT MAGIC Maker Co-Op – Rochester, NY

June 2019 – August 2019

- Organized and scheduled tasks for a team of 3 to ensure that milestones were continuously met
- Developed gameplay scripts as well as scripts for audio visualization
- Designed, developed, and implemented art assets such as 3d models, textures, shaders, and sprites
- Optimized art assets and pipeline to meet performance guidelines on mobile devices
- Published for App Store and Google Play. Link: <https://overdrivegame.com>

Pohanka Lexus Automotive Group – Chantilly, VA

June 2018 – August 2018

- Coordinated with service advisors and mechanics to help ensure customer satisfaction with service requests
- Moved customer vehicles for convenience and worked with teammates to keep an organized workspace

RIT ITS Tech Management – Rochester, NY

February 2018 – May 2018

- Learned skills in hardware software, and network repair during 11 week training program
- Provided one-on-one customer support to RIT faculty, staff, students, and retirees

Skills

- Languages: C#, C++, Java, HTML, CSS, JavaScript, Matlab
- Software:
 - Art: Blender, Maya, Mudbox, ZBrush, Substance Painter, Gimp, Photoshop, Illustrator, After Effects
 - Development: Visual Studio, Unity, Unreal Engine, MonoGame
 - Other: Git, Gitlab, Github, Slack

Projects

Neurotechnology Exploration Team (Research Project)

February 2019 – Present

- Creating a 3D racing game using muscle sensors as input for rehabilitation purposes with a team of 11
- Currently acting as the main 3D asset producer, as well as assisting in gameplay scripting and overall design

Wild MAGIC Game Jam (48-hour hackathon)

October 2019

- Collaborated with 3 other teammates to create 3d puzzle platforming game using Unity and C#
- Developed and implemented models, textures, shaders, and post processing to meet the game's visual goals

DreamEscape (Academic based personal project)

September 2018 – May 2019

- Assisted students in capstone design course using Unity and C#
- Collaborated with team to create designs for 3D assets that fit game's theme and gameplay
- Implemented models, textures, and animations to function with gameplay. Also utilized Unity shaders and post processing to improve game's overall look

BrickHack 2019 (24-hour hackathon)

February 2019

- Created a 2D party platforming game in Unity with a team of 4
- Implemented art assets made by team members into game engine and assisted in development gameplay scripts
